

Coffee Maker Deep Clean

HOW TO:

- Throw away any old coffee grounds and filters.
- Add a new filter to the coffee pot.
- Pour vinegar into the coffee maker reservoir half way. Then add water to the fill line.
- Turn the coffee maker on and run a regular cycle.
- Let the hot water and vinegar solution sit a little while and then, wipe down any stains and mineral build up in the carafe and the interior and exterior of the coffee maker.
- Change the filter once more and add only water to the coffee maker.
- Turn the coffee pot on and run one more cycle of just water.
- Enjoy a clean coffee maker!
